## INFORMATION REGARDING YOUR WETTERTUETE

Please only cover your garden furniture when it is completely dry.

In the case of sensitive materials (e.g. wooden or natural stone tables), we also recommend placing an object (ball, bucket, bowl or similar) between the table top and the cover. This allows the water to run off and the air under the cover to circulate better. Avoid and

remove large pools of water on the cover. The resulting pressure from the weight of the water can damage the seams.

We recommend taking a look under the cover every few weeks in order to react in good time to any damage to the garden furniture. Please make sure that the cover does not lie permanently on damp ground. The moisture from wet paving stones / wooden planks or similar has no way of escaping, which in the worst case can lead to the formation of mold under the cover.

Especially in cold and damp weather, the breathability is not sufficient for such a large amount of moisture to be able to evaporate through the cover.

Please store your upholstery in winter and do not leave it under the weather bag.

Secure your cover from flying away with drawstring and fastening straps. If the weather service warns of a stronger storm, please remove the cover beforehand and store it. Unfortunately, our cover does not always withstand unscathed a storm that even uproots trees.

## CARE INSTRUCTIONS

Our fabric 2.1. is machine washable at 30°. It consists of 58% polyurethane and 42% polyester.

Please do not use fabric softener and do not put the cover in the dryer.

## SEAM DAMAGED?

If a seam is damaged, please do not use adhesive tape to seal it, otherwise we will not be able to repair the area.

Find out how best to proceed in the event of damage at [www.wettertute.de/en/repair/](http://www.wettertute.de/en/repair/)

## ARE YOU SATISFIED?

Then we would be very happy about a positive rating or Posts and photos with the hashtag #wettertute.

## IS THERE A PROBLEM?

**Then contact us please!**  
**We are going to find a solution!**

We are always very happy when we receive photos that we use for our reference gallery, Instagram or Facebook allowed to use. In this way, other customers get suggestions and ideas about the manufactured wettertuten.
